Slammer worm slithers back online to attack ancient SQL servers

If you get taken down by this 13-year-old malware, you probably deserve it

5 Feb 2017 at 23:29, Darren Pauli

Slammer, has resumed attacking servers some 13
s in 10 minutes, researchers say.

crosoft SQL server and Desktop Engine triggering
significantly choking internet traffic.

to Slammer which was created on the back of public
k Hat by now Google security boffin David Litchfield.

cks in early December, noting that most targeted

," researchers say.

directed to a large variety of destination countries
ks in the United States.

targeted one."

and 4 December, 2016, and were some of the biggest

hina, Vietnam, and Mexico.

This new batch of Slammer-wielders must be optimists, given that the worm targeted a now-ancient SQL Server 2000 buffer overflow vulnerability that DBAs have had 13 years to fix.

Still, application of even important patches can be slow. Microsoft last year found that the then vulnerability (CVE-2010-2568) exploited by the six-year-old Stuxnet worm, arguably the most famous information security threat, was the most common means to compromise users. ®

Tips and corrections

Tesco Bank customers lose money to 'fraudsters'

1 hour ago | Business

Share

Thousands of Tesco Bank current account customers appear to have been targeted by fraudsters, with some saying they have lost hundreds of pounds.

Customers have complained about money being withdrawn without permission, cards being blocked and long delays to get through to the bank on the phone.

The bank said its anti-fraud systems had identified "suspicious activity" on some customer accounts.

Majority of workers blindly open email attachments

Read the latest issue of the (IN)SECURE Magazine

The vast majority (82 percent) of users open email attachments if they appear to be from a known contact, despite the prevalence of well-known sophisticated social engineering attacks, according to Glasswall. Of these respondents, 44 percent open these email attachments consistently every time they receive one, leaving organizations vulnerable to data breaches sourced to malicious attachments.

Only 30% of office-workers believe their employer has been subjected to cyber attack

75% receive suspicious emails

62% don't check email attachments from unknown sources

Marawi terrorist starting to target bank branches including ours!!!

hello Enna,

I hope you are doing well. I read the news story http://badlink.com about the horrible terrorist declaring that they would start attacking bank branches including ours! I'm afraid that they may also target our job fair on the 23rd. It has me very frightened and I wanted to make sure you were aware since your branch may be targeted!!!

Take Care,
Anne Sanchez

Uptick in social media-based attacks

By Admire Moyo, ITWeb's senior news journalist.
Johannesburg, 31 Oct 2016

Cyber criminals are taking advantage of social media networks to spread malware and steal money from unsuspecting users.

This is one of the biggest findings in the Easy Solutions 2016 Fraud Beat report released on Friday. The report identifies the most recent and sophisticated cyber attacks impacting companies, financial institutions and consumers across the globe.

The digital revolution, led by users who are always connected to the Internet through their smartphones, offers boundless ?nancial opportunities for banks and businesses, says Easy Solutions. However, the security solutions vendor notes the digital revolution is also attracting the attention of cyber criminals for the same reasons.

The prevalence of social media has not gone unnoticed by cyber criminals.

There are over 80 million fake profiles on Facebook, Twitter and Instagram alone, and a large portion are used to launch social media attacks, the vendor notes.

Facebook announced it had surpassed a billion-and-a-half users at the end of last year, the report notes. Its user base would be the largest nation in the world if it were a country, even bigger than China.

Facebook estimates 2% of its 1.6 billion users are fake, which translates into more than 30 million counterfeit accounts. Twitter estimates about 5% of its profiles are fake, while Instagram approximates this number at around 8%.

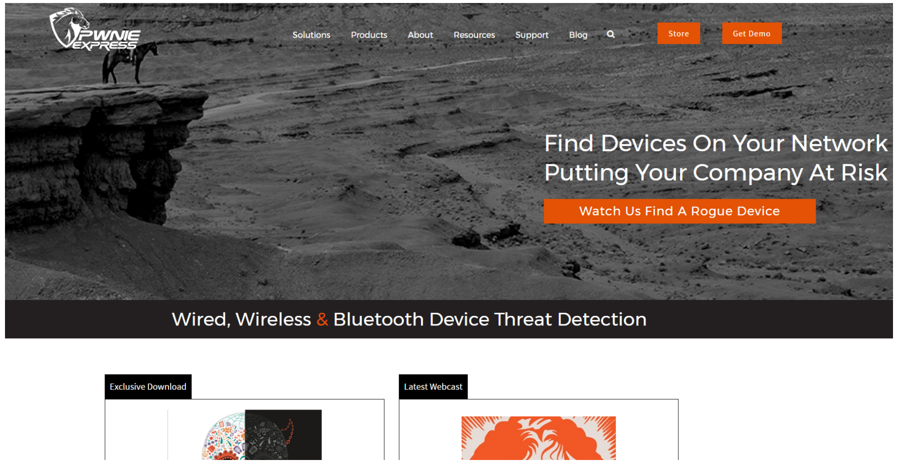
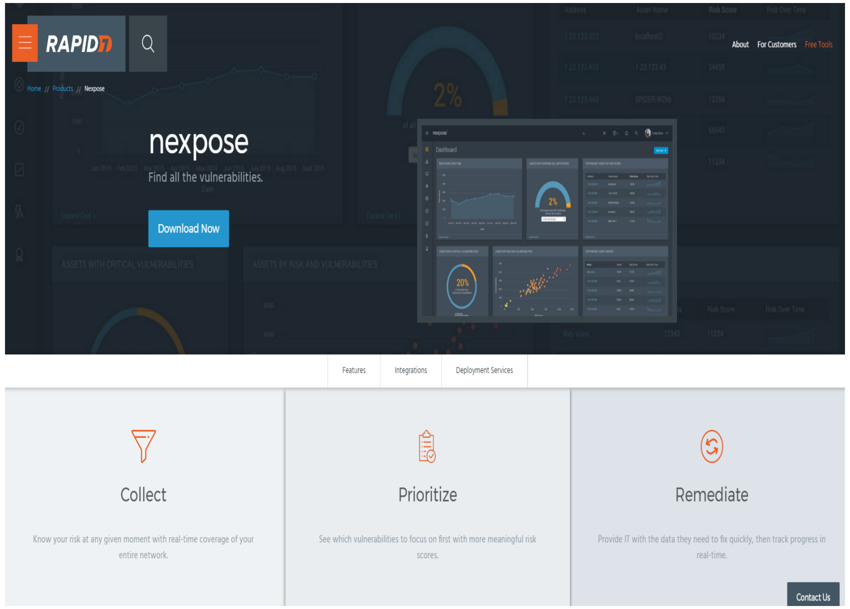
CYBER ATTACK SIMULATIONS



Find Devices On Your Network Putting Your Company At Risk

Wired, Wireless & Bluetooth Device Threat Detection



nexpose

Find all the vulnerabilities.

Collect

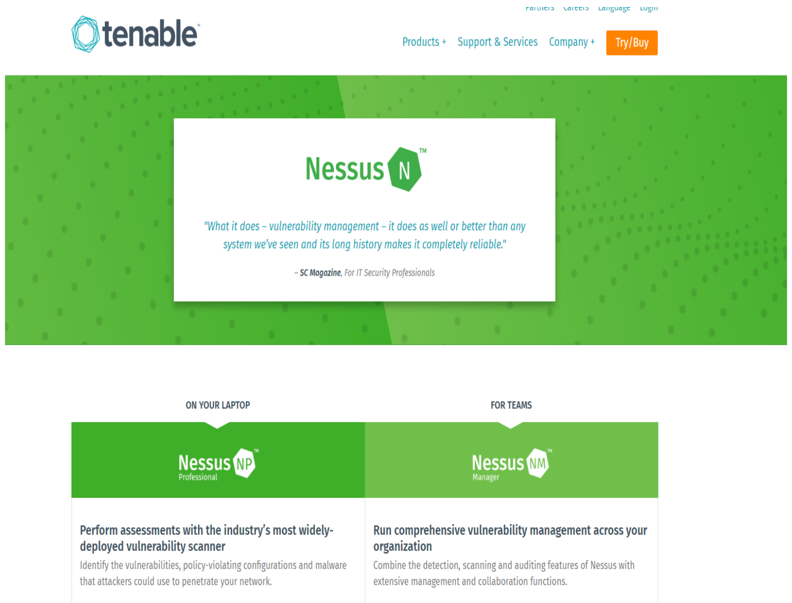
Know your risk at any given moment with real-time coverage of your entire network.

Prioritize

See which vulnerabilities to focus on first with more meaningful risk scores.

Remediate

Provide IT with the data they need to fix quickly, then track progress in real-time.



"What it does – vulnerability management – it does as well or better than any system we've seen and its long history makes it completely reliable."

– *SC Magazine*, For IT Security Professionals

ON YOUR LAPTOP

Perform assessments with the industry's most widely-deployed vulnerability scanner

Identify the vulnerabilities, policy-violating configurations and malware that attackers could use to penetrate your network.

FOR TEAMS

Run comprehensive vulnerability management across your organization

Combine the detection, scanning and auditing features of Nessus with extensive management and collaboration functions.

If All Else Fails!

Explore Miniature Wonderland with Google Maps

Executive Overview

1. Security is a cost center until the lack of it cost you everything!

2. Show your employees that you take security seriously and then they will!

3. Patch – Passwords – Public WIFI – Paranoia (a healthy amount) ;-)

A Mubix Moment

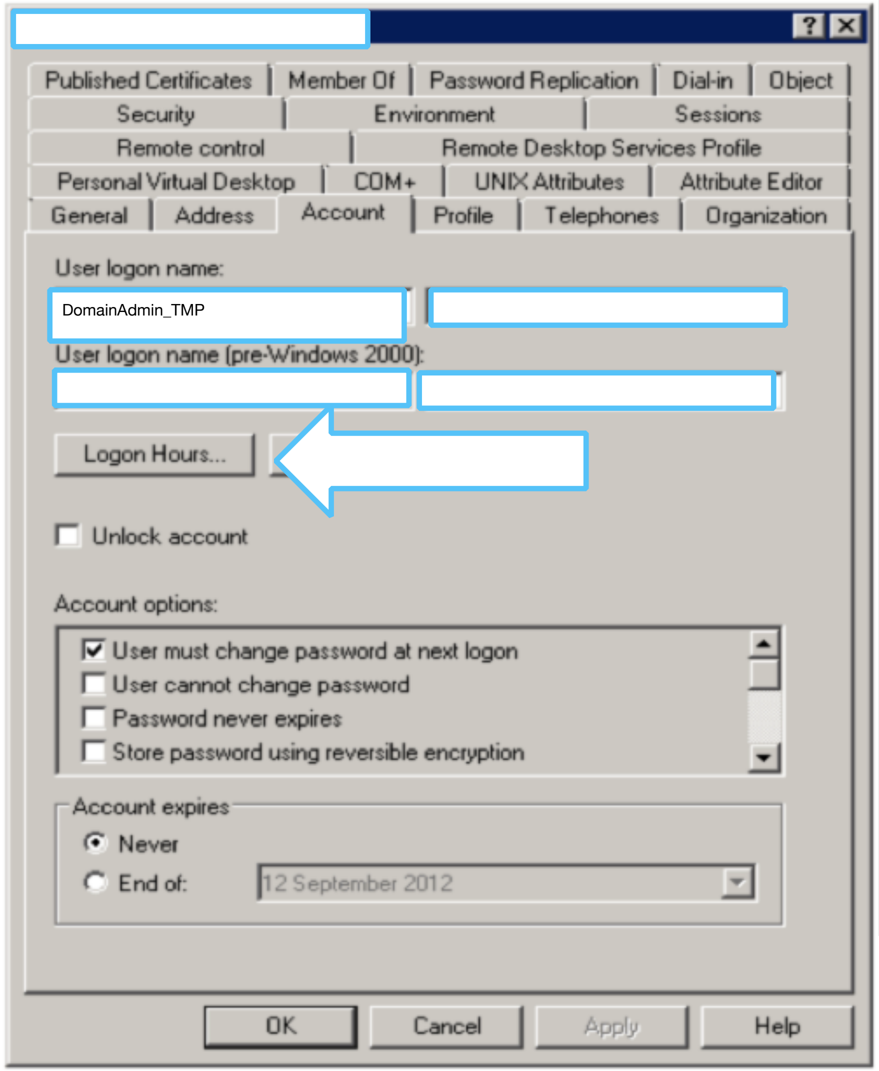
WPAD
Make a null route (to 127.0.0.1 IPV4 ::1 IPV6) DNS entry for WPAD
Make a null route (to ::1 IPV6) DNS entry for WPADWPADWPAD

Disable NetBios resolution domain wide.

A Mubix Moment

Evil Canary

1. Create user called “DomainAdmin_TMP”
2. Put password in the description.
3. Add to Domain Admins Group!
4. Under Logon Hours set to ZERO
5. Set an alert ANY time that accou
   tries to logon!



User logon name:
DomainAdmin_TMP

User logon name (pre-Windows 2000):

□ Unlock account

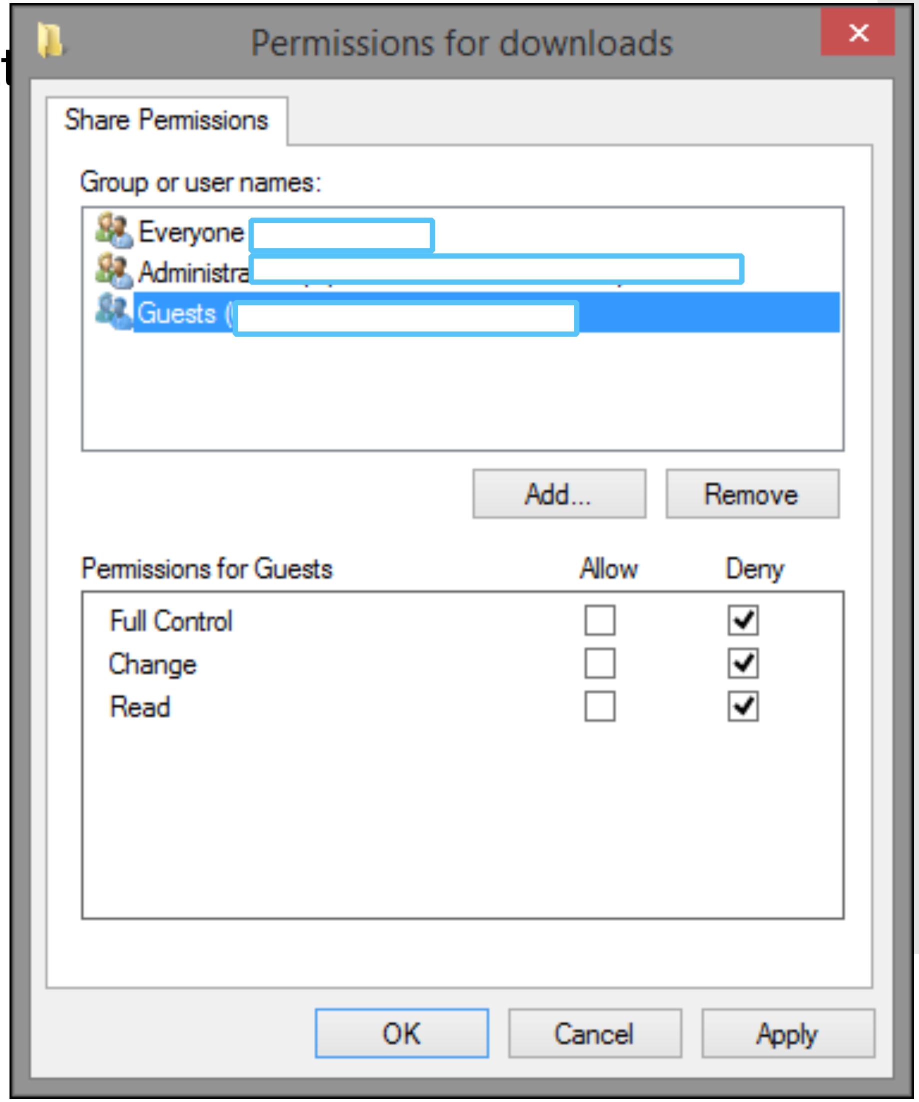
Account options:

☑ User must change password at next logon
□ User cannot change password
□ Password never expires
□ Store password using reversible encryption

Account expires
● Never
○ End of: 12 September 2012

A Mubix Moment

Evil Canary
Make a public share called
“Password Audit 2015” inside creat
a EXLS file about 4 MB but
“Everyone: Deny” permission.



Group or user names:

- Everyone [redacted]
- Administra[redacted]
- Guests ([redacted]

Permissions for Guests	Allow	Deny
Full Control	□	☑
Change	□	☑
Read	□	☑

A Few Last Tricks & Traps

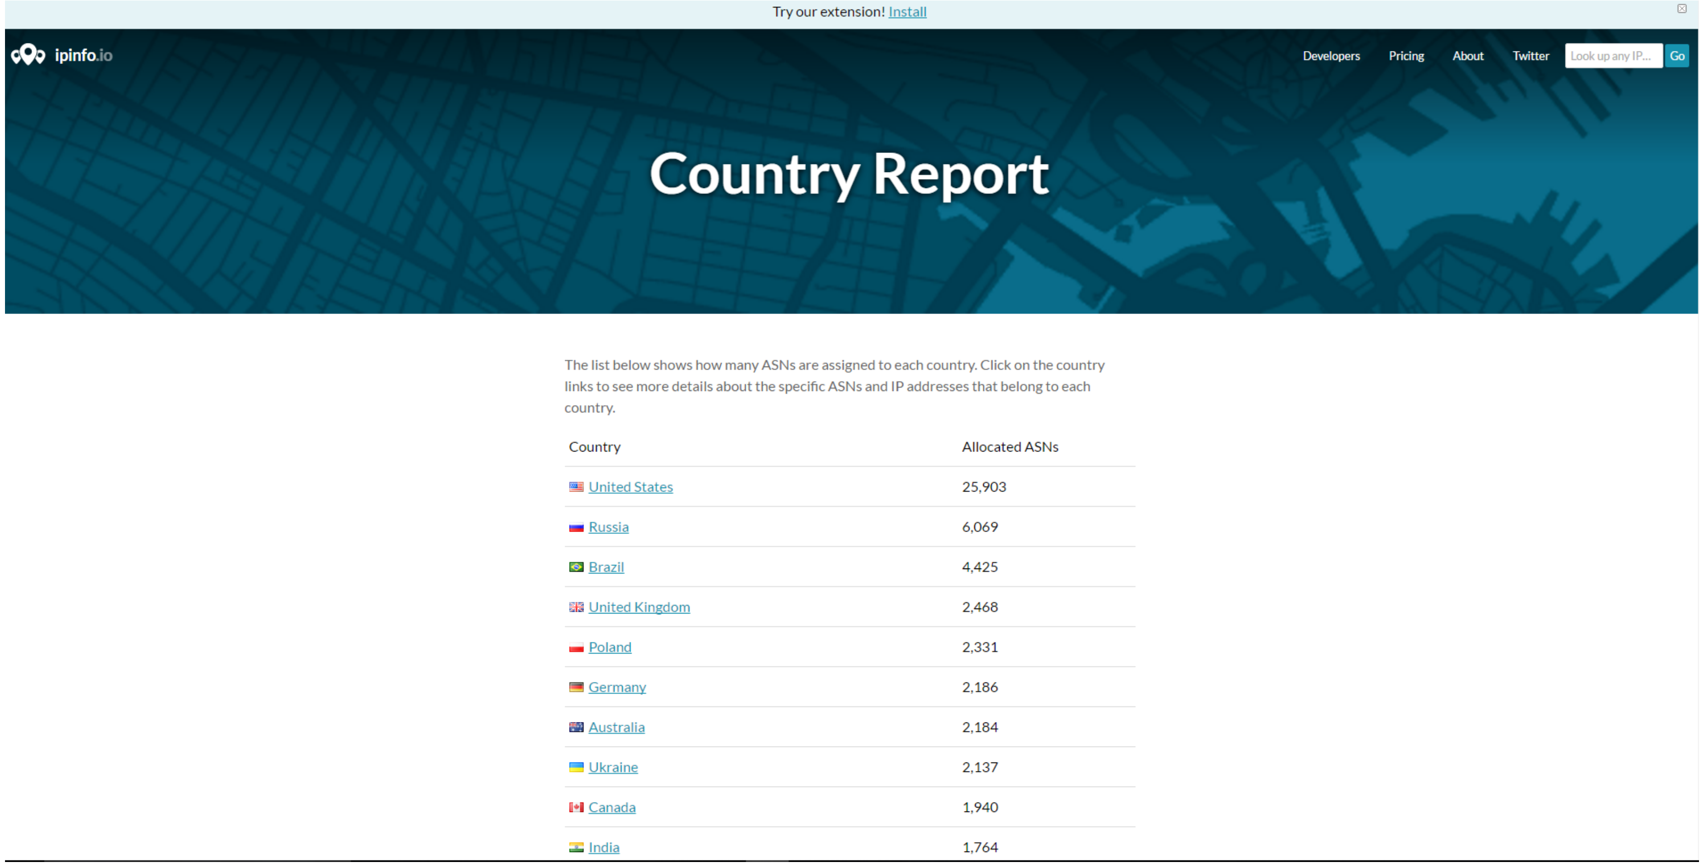
4. Control the countries that can see you if you can.
http://ipinfo.io/countries



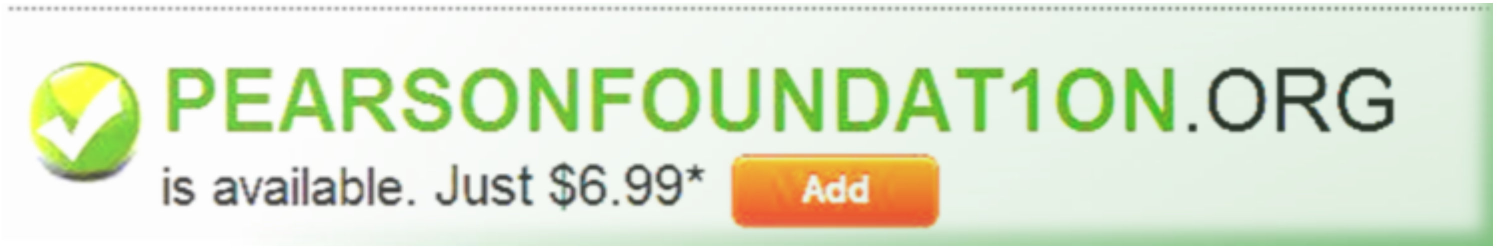
Country Report

The list below shows how many ASNs are assigned to each country. Click on the country links to see more details about the specific ASNs and IP addresses that belong to each country.

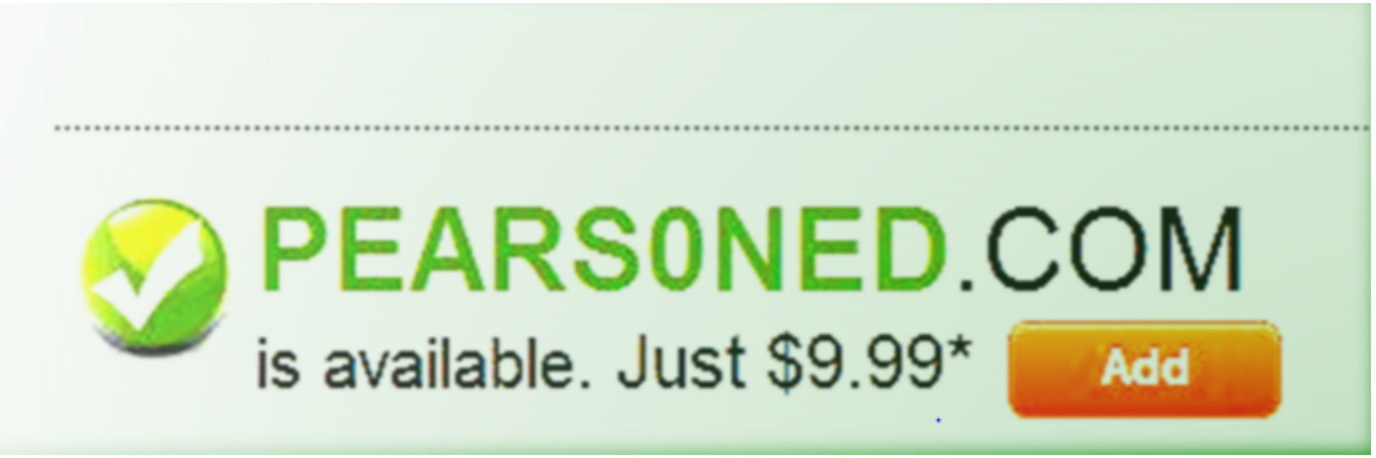
Country	Allocated ASNs
United States	25,903
Russia	6,069
Brazil	4,425
United Kingdom	2,468
Poland	2,331
Germany	2,186
Australia	2,184
Ukraine	2,137
Canada	1,940
India	1,764

A Few Last Tricks & Traps

5. Own as many domains similar to yours as possible (Because someone will!)



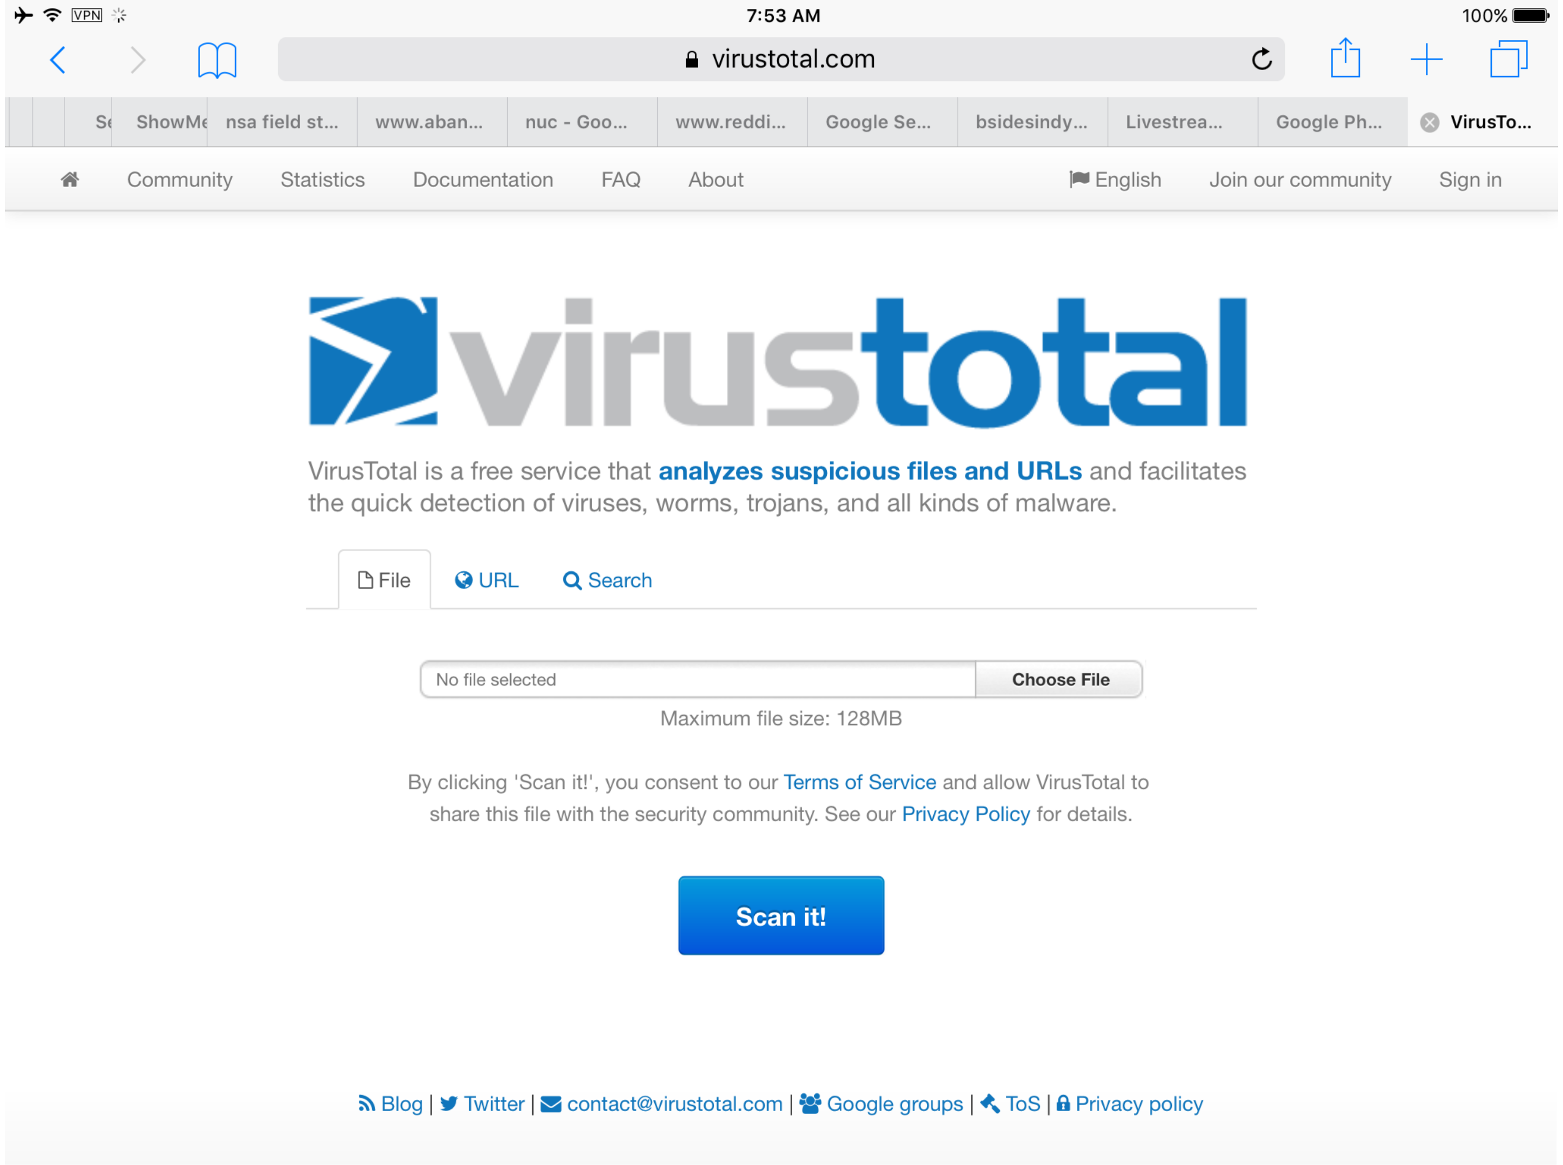
PEARSONFOUNDAT1ON.ORG is available. Just $6.99*



PEARS0NED.COM is available. Just $9.99*

A Few Last Tricks & Traps

6. You have to click links at some point or download attachments just be cautious!



VirusTotal is a free service that **analyzes suspicious files and URLs** and facilitates the quick detection of viruses, worms, trojans, and all kinds of malware.

No file selected | Choose File

Maximum file size: 128MB

By clicking 'Scan it!', you consent to our Terms of Service and allow VirusTotal to share this file with the security community. See our Privacy Policy for details.

Las Vegas 'Security Week': Black Hat USA

This week, Las Vegas will host the 20th annual Black Hat USA security conference, which draws information and cyber security professionals from across the globe. In an effort to increase awareness, we have prepared the following tip on how to keep your personal and corporate information safe throughout this and all other conferences.

Security Tip: Email Phishing
Email phishing is using familiar or interesting subject lines and topics to lure people into clicking links or opening attachments that may download malware onto computer systems or phones. We ask that MGMRI employees exercise extra caution and avoid opening emails, attachments, or links from unknown senders. If you receive something suspicious, forward the message to phishing@mgmresorts.com.

SEE SOMETHING SAY SOMETHING

Help us make a difference

SET KIDS UP FOR SUCCESS Food & School Supplies Drive

The "Set Kids Up For Success" Food & School Supplies Drive wraps up on July 31, but there's still a week left to donate!

For those that donate five or more items, join us for a special ice cream treat at the EDR on **Thursday, July 27** from **1 p.m. - 3 p.m. and 6 p.m. - 8 p.m.** and help set Southern Nevada students up for success this school year.

Whatever you choose to donate for this drive – be it one box of pencils, several cans of soup, or an entire pallet of macaroni and cheese – will have a huge impact on the lives of friends, neighbors and even co-workers in our Las Vegas Valley community. Three Square shared with us these impact statements from residents relying on its programs:

Debbie has been out of work since December. For now, the only source of income she has for her three children is monthly child support. Her children receive free breakfasts and lunches at school, but the family relies on Three Square assistance to get through the summer break through Three Square's program partner
