QUICK GUIDE

September 25-27, 2019
Taal Vista Hotel, Tagaytay,
Philippines

SUPPORT & CONNECT TO THE GROWING INFOSEC AND HACKING COMMUNITY IN THE PHILIPPINES

Since it's inception in 2007, ROOTCON has witnessed the growing Information Security & Hacking Community, from only 20 attendees, ROOTCON grew to 450+ attendees, it is very well attended by local and international security professionals, researchers and enthusiasts.

We can humbly say that ROOTCON is the longest and largest running Information Security conference in the Philippines.

REASONS TO ATTEND

Security awareness - Gain Security awareness in knowing the latest trends in Information Security.

Competitiveness - Enhance technical skills and capabilities through the demos and action pack activities.

Social network - Get to meet known and respected personalities in the Information Security industry, widen your network of professionals.
ROOTCON AT A GLANCE

ROOTCON have gained respect from the Information Security and Hacking Community since 2008, we can humbly claim that we are the largest Information Security and Hacking Conference in the country.

We have been successful in keeping access to the conference affordable for the hacking community. This balance between content and affordability is the reason ROOTCON has been consistently a huge success. Our sponsors play a key role in keeping this balance.

ROOTCON 12 SPEAKER HIGHLIGHTS

Craig is the Director of Transportation Security and Research at Rapid7, a cybersecurity analytics and automation company. He is also the founder of Open Garages, a distributed collective of performance tuners, mechanics, security researchers and artists. Craig authored the "Car Hacker's Handbook", the de facto guide to automotive security. At Rapid7, Craig runs the Transportation Practice.

Craig Smith

Patrick is the Chief Research Officer at Digita Security and founder of Objective-See. Having worked at NASA and the NSA, as well as presented at countless security conferences, he is intimately familiar with aliens, spies, and talking nerdy.

Patrick is passionate about all things related to macOS security and thus spends his days finding Apple 0days, analyzing macOS malware and writing free open-source security tools to protect Mac users.

Patrick Wardle

Aseem Jakhar is the Director, research at Payatu Software Labs http://payatu.com a boutique security testing company specializing in IoT, Embedded, cloud, mobile security testing. He is the founder of null-The open security community, registered not-for-profit organization http://null.co.in and also the founder of nullcon security conference http://nullcon.net and hardwear.io security conference. He has worked on various security software including UTM appliances, messaging/security appliances, anti-spam engine, anti-virus software, bayesian engine to name a few. He currently spends his time researching on IoT security and hacking things.

Aseem Jakhar

SCHEDULE

Day Ø September 25 (New)	• Advanced Trainings
Day 1 September 26	• Main Conference • Basic Trainings
Day 2 September 27	• Main Conference • Basic Trainings
ZerØ-Hour Party September 27	• Post Conference Party

CONTESTS AND VILLAGES

Lockpick Village	Learn the basics of Physical Security
Car Hacking Village (New)	Explore & Learn the world of Car Hacking
Capture The Flag	The most gruelling game in every heart of a hacking conference is here at ROOTCON as well! Challenges range from web exploitation, forensics, crypto puzzles and trivia.
Hacker Jeopardy	If you've been to a RootCon party, you've probably witnessed and enjoyed our infamous Hacker Jeopardy game! Hacker Jeopardy game has been an integral part of the ROOTCON's culture of intellectual fun.

Each year the ROOTCON Goons are working tirelessly to improve the conference and to add new, exciting and awesome things. This year we have two new additions to the conference, Day 0 (September 25) will be hosting an Advanced Trainings, we also added a new village this year which is the Car Hacking Village where attendees can explore and learn the world of Car Hacking.

We are very much stoked to see everyone gather one again this year for an awesome hacking conference experience.
